ORCHIDS THE INTERNATIONAL SCHOOL

SOUTH CITY I, GURUGRAM

COMPUTER APPLICATIONS

PRACTICAL FILE

Class X | Subject Code: 165

HTML-Based Practical Work

Student's Name	Suryansh
Class & Section	X-A
Roll Number	_____
Academic Session	2026–2027
Subject Teacher	_____

Certificate

This is to certify that _____Suryansh_____ of Class X, Section __A__, has completed the Computer Applications (Code 165) practical file for the academic session 2026–2027 under the guidance of the subject teacher. The work presented in this file is prepared for learning and practice of basic HTML.

Teacher's Signature: _____ Date: _____
Parent's Signature: _____

Acknowledgement

I would like to thank my Computer Applications teacher for the guidance and support provided while completing this practical file. I also thank my school and parents for encouraging me to practise HTML and develop my web-page creation skills.

General Instructions

- Type each program in a plain-text editor such as Notepad or a code editor.
- Save the file with the .html extension, for example, practical1.html.
- Open the saved file in a web browser to view the output.
- Use the exact opening and closing tags shown in the examples.
- For the image practical, keep the image file in the same folder as the HTML file and update its filename if needed.
- Take a screenshot or draw/paste the output in the space provided by your teacher, if required.

Index

S. No.	Practical / Program	Teacher's Signature
1	Basic HTML page with title and headings	
2	Text formatting and line breaks	
3	Ordered and unordered lists	
4	Hyperlink to a website	
5	Insert an image	
6	Create a table	
7	Background and text colours	
8	Nested list	
9	Student profile using headings and paragraphs	

10	Simple feedback form	

Practical 1: Basic HTML Page with Headings

Aim: To create a simple web page using the basic HTML structure and heading tags.

HTML Code:

```
<!DOCTYPE html>
<html>
<head>
  <title>My First Web Page</title>
</head>
<body>
  <h1>Welcome to My Web Page</h1>
  <h2>Computer Applications</h2>
  <p>This is my first HTML practical.</p>
</body>
</html>
```

Expected Output: A browser page showing the heading “Welcome to My Web Page”, a smaller heading “Computer Applications”, and a paragraph.

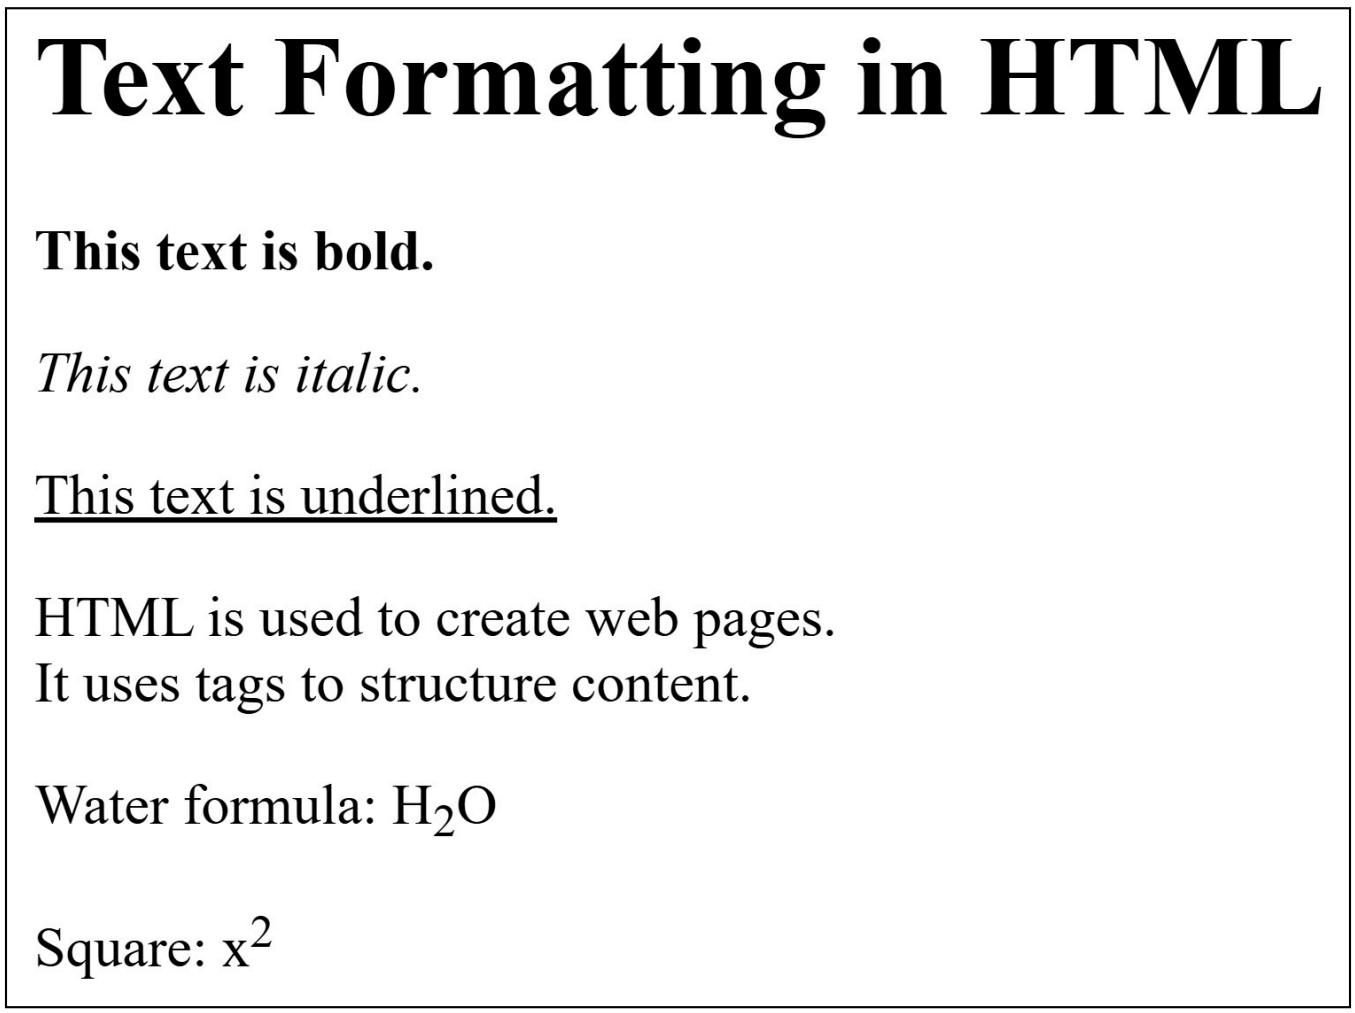

Practical 2: Text Formatting and Line Breaks

Aim: To display bold, italic, underlined, and line-broken text.

HTML Code:

```
<!DOCTYPE html>
<html>
<head>
  <title>Text Formatting</title>
</head>
<body>
  <h1>Text Formatting in HTML</h1>
  <p><b>This text is bold.</b></p>
  <p><i>This text is italic.</i></p>
  <p><u>This text is underlined.</u></p>
  <p>HTML is used to create web pages.<br>
    It uses tags to structure content.</p>
  <p>Water formula: H<sub>2</sub>O</p>
  <p>Square: x<sup>2</sup></p>
</body>
</html>
```

Expected Output: The browser displays bold, italic, underlined text, a line break, H_2O, and x^2.

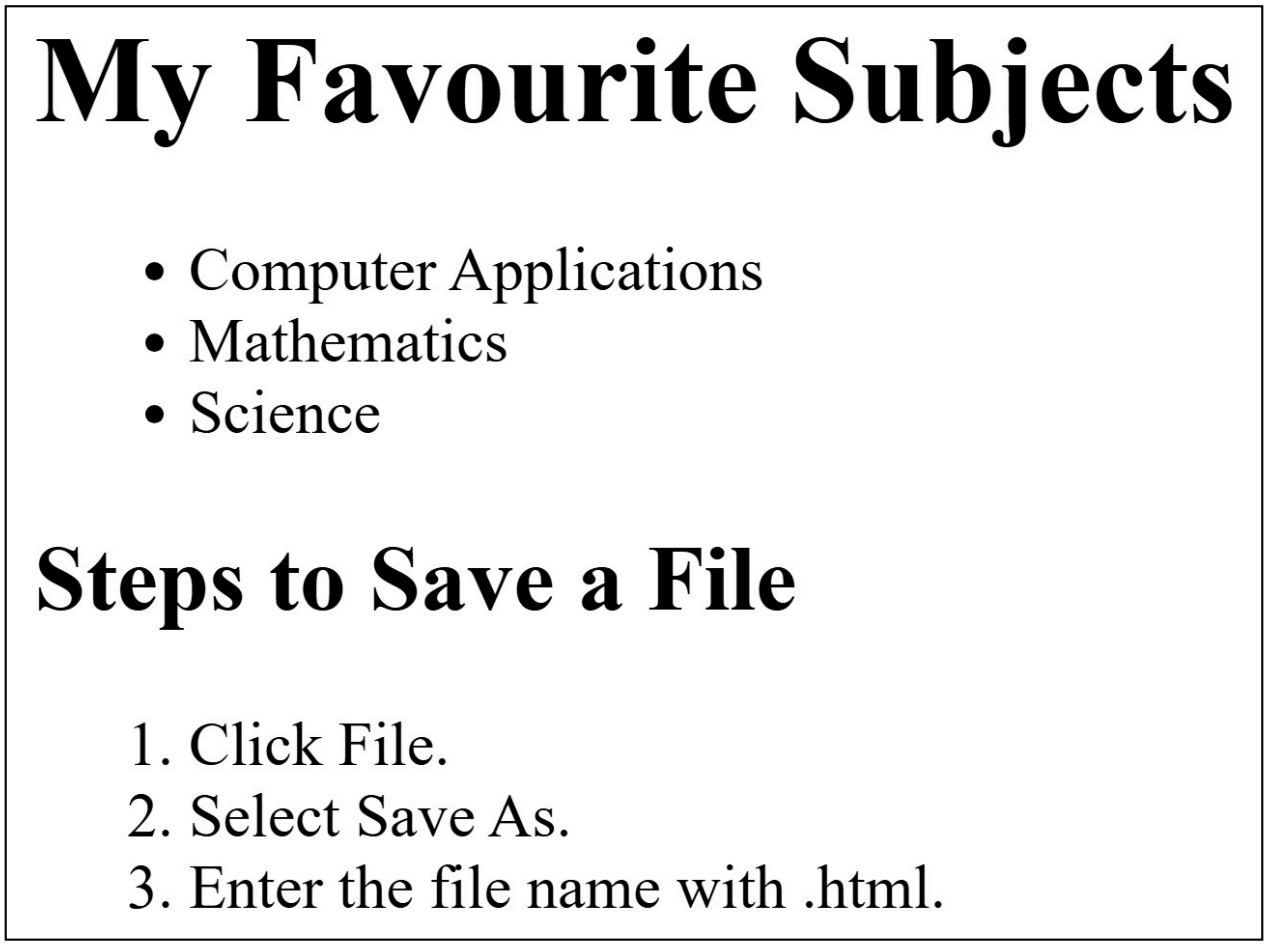

Practical 3: Ordered and Unordered Lists

Aim: To create numbered and bulleted lists in HTML.

HTML Code:

```
<!DOCTYPE html>
<html>
<head>
  <title>HTML Lists</title>
</head>
<body>
  <h1>My Favourite Subjects</h1>
  <ul>
    <li>Computer Applications</li>
    <li>Mathematics</li>
    <li>Science</li>
  </ul>
  <h2>Steps to Save a File</h2>
  <ol>
    <li>Click File.</li>
    <li>Select Save As.</li>
    <li>Enter the file name with .html.</li>
  </ol>
</body>
</html>
```

Expected Output: The first list appears with bullets and the second list appears with numbers.

Practical 4: Hyperlink to a Website

Aim: To create a clickable hyperlink using the anchor tag.

HTML Code:

```
<!DOCTYPE html>
<html>
<head>
  <title>Useful Website</title>
</head>
<body>
  <h1>Learn HTML</h1>
  <p>Visit the W3Schools website to learn more:</p>
  <a href="https://www.w3schools.com/html/">Learn HTML</a>
</body>
</html>
```

Expected Output: A clickable link labelled “Learn HTML” appears. Clicking it opens the linked website in the browser.

Practical 5: Insert an Image

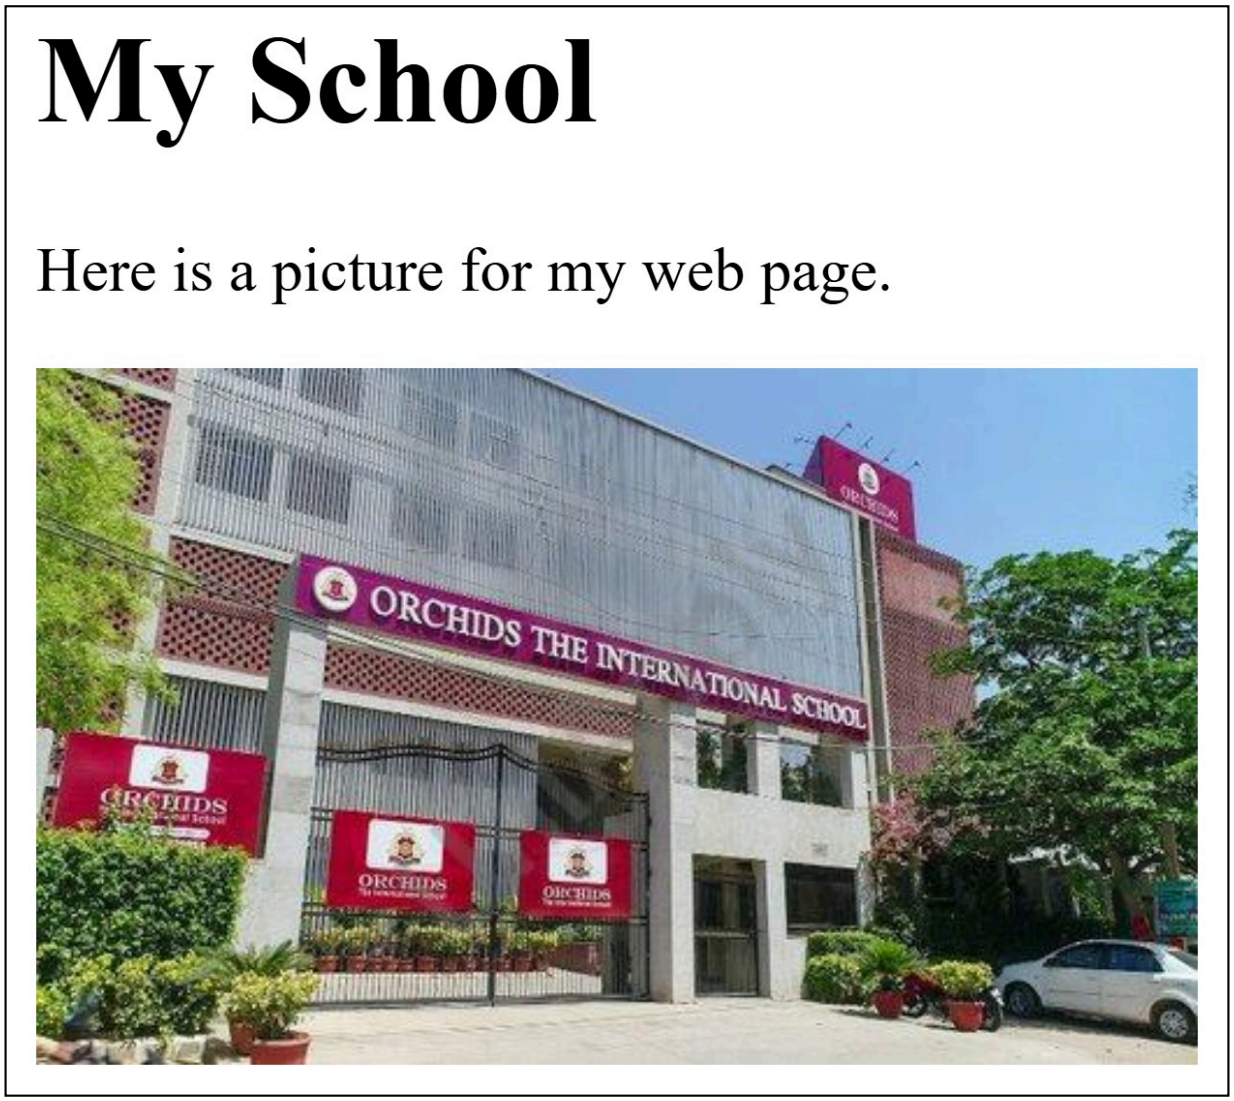

Aim: To display an image on a web page using the img tag.

HTML Code:

```
<!DOCTYPE html>
<html>
<head>
  <title>My School</title>
</head>
<body>
  <h1>My School</h1>
  <p>Here is a picture for my web page.</p>
  <img src="school.jpg" alt="School picture" width="300">
</body>
</html>
```

Expected Output: The browser displays the image school.jpg at a width of 300 pixels, if the image file is in the same folder.

Note: Replace school.jpg with the actual image filename. The alt text is shown if the image cannot load.

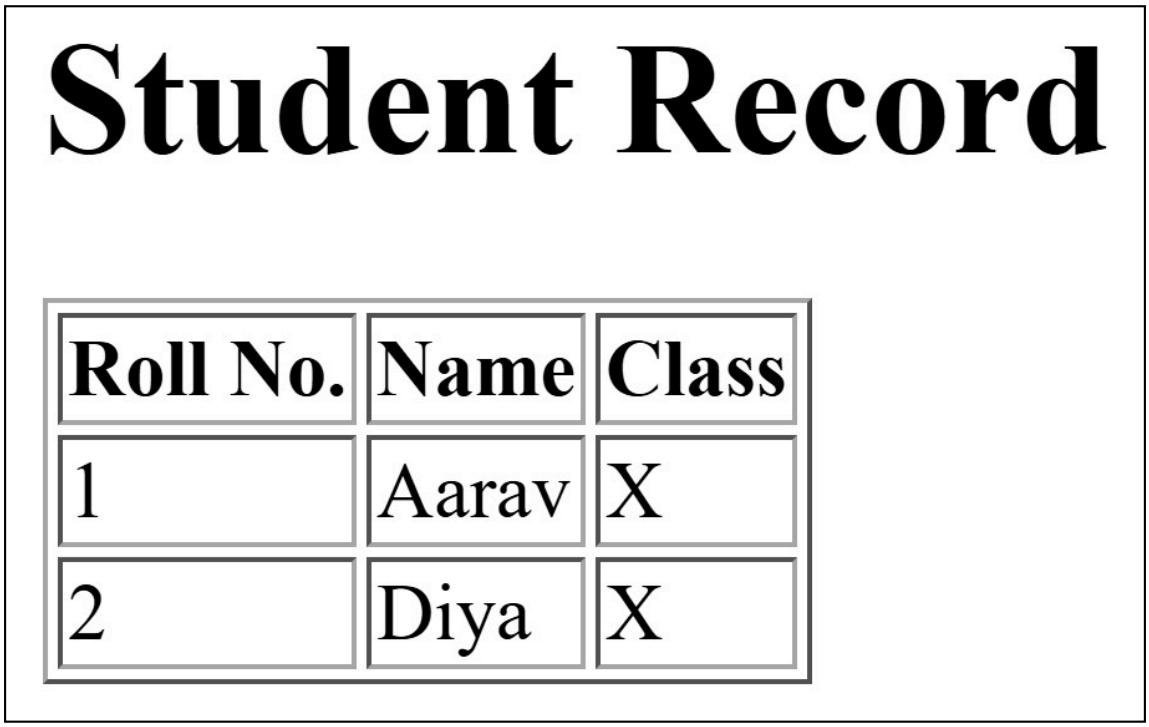

Practical 6: Create a Table

Aim: To organise student information in rows and columns using an HTML table.

HTML Code:

```
<!DOCTYPE html>
<html>
<head>
  <title>Student Record</title>
</head>
<body>
  <h1>Student Record</h1>
  <table border="1">
    <tr>
      <th>Roll No.</th>
      <th>Name</th>
      <th>Class</th>
    </tr>
    <tr>
      <td>1</td>
      <td>Aarav</td>
      <td>X</td>
    </tr>
    <tr>
      <td>2</td>
      <td>Diya</td>
      <td>X</td>
    </tr>
  </table>
</body>
</html>
```

Expected Output: A table appears with three columns: Roll No., Name, and Class, and two student records.

Practical 7: Background and Text Colours

Aim: To set a page background colour and change text colour using HTML attributes/styles.

HTML Code:

```
<!DOCTYPE html>
<html>
<head>
  <title>Colours in HTML</title>
</head>
<body style="background-color: lightyellow;">
  <h1 style="color: darkblue;">My Colourful Page</h1>
  <p style="color: green;">HTML can display coloured text.</p>
  <p style="color: maroon;">This is another coloured paragraph.</p>
</body>
</html>
```

Expected Output: A light-yellow page appears with a dark-blue heading and green and maroon paragraphs.

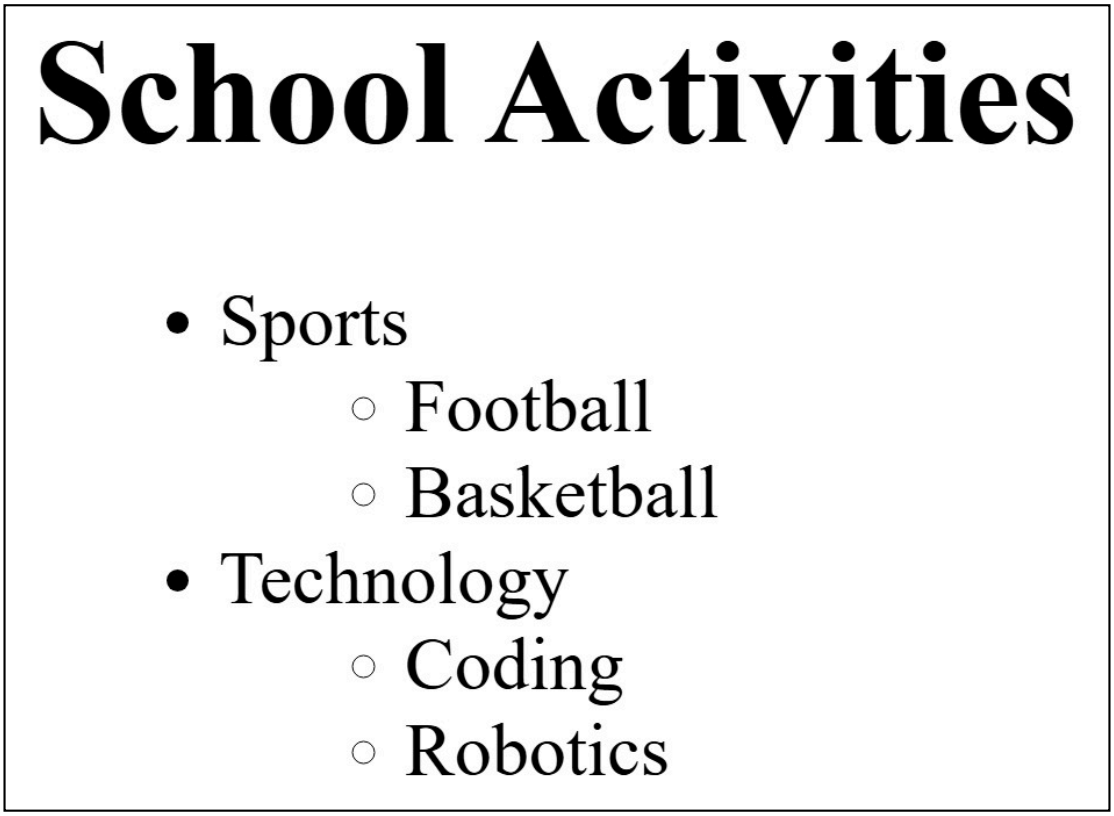

Practical 8: Nested List

Aim: To create a list inside another list.

HTML Code:

```
<!DOCTYPE html>
<html>
<head>
  <title>Nested List</title>
</head>
<body>
  <h1>School Activities</h1>
  <ul>
    <li>Sports
      <ul>
        <li>Football</li>
        <li>Basketball</li>
      </ul>
    </li>
    <li>Technology
      <ul>
        <li>Coding</li>
        <li>Robotics</li>
      </ul>
    </li>
  </ul>
</body>
</html>
```

Expected Output: The main list shows Sports and Technology, each with a smaller nested list underneath.

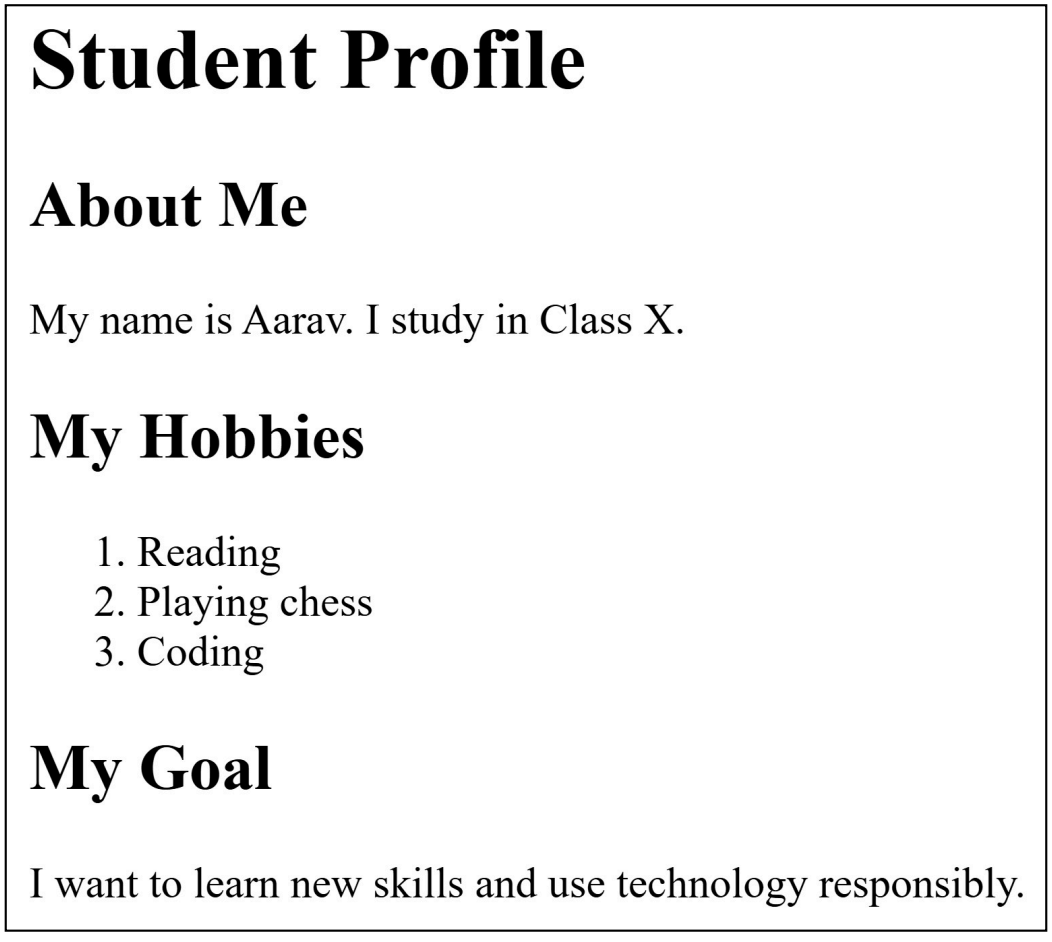

Practical 9: Student Profile

Aim: To create a student profile using headings, paragraphs, and a list.

HTML Code:

```
<!DOCTYPE html>
<html>
<head>
  <title>Student Profile</title>
</head>
<body>
  <h1>Student Profile</h1>
  <h2>About Me</h2>
  <p>My name is Aarav. I study in Class X.</p>
  <h2>My Hobbies</h2>
  <ol>
    <li>Reading</li>
    <li>Playing chess</li>
    <li>Coding</li>
  </ol>
  <h2>My Goal</h2>
  <p>I want to learn new skills and use technology responsibly.</p>
</body>
</html>
```

Expected Output: A profile page displays an introduction, hobbies in a numbered list, and a goal. Replace sample details with your own.

Practical 10: Simple Feedback Form

Aim: To create a basic HTML form with text input, radio buttons, a drop-down list, and a submit button.

HTML Code:

```
<!DOCTYPE html>
<html>
<head>
  <title>Feedback Form</title>
</head>
<body>
  <h1>Website Feedback</h1>
  <form>
    <label for="name">Name:</label>
    <input type="text" id="name" name="name"><br><br>

    <p>How was the website?</p>
    <input type="radio" id="good" name="rating" value="Good">
    <label for="good">Good</label>
    <input type="radio" id="average" name="rating" value="Average">
    <label for="average">Average</label><br><br>

    <label for="topic">Favourite topic:</label>
    <select id="topic" name="topic">
      <option>HTML</option>
      <option>Lists</option>
      <option>Tables</option>
    </select><br><br>

    <input type="submit" value="Submit">
  </form>
</body>
</html>
```

Expected Output: A simple feedback form appears. The submit button demonstrates the form control; it will not store or send responses without a server or form-processing service.

Note: Use only fictional/sample details in practice files; do not enter sensitive personal information.

.

Practical Completion Record

S. No.	Practical	Date	Teacher's Signature
1	Basic HTML page with title and headings		
2	Text formatting and line breaks		
3	Ordered and unordered lists		
4	Hyperlink to a website		
5	Insert an image		
6	Create a table		
7	Background and text colours		
8	Nested list		
9	Student profile using headings and paragraphs		
10	Simple feedback form
